Experiment -1

AIM: To create an AWS free tier account to provision the resources.

Description:

AWS (Amazon Web Services) is a cloud computing platform provided by Amazon that offers various services such as computing, storage, databases, networking and security over the internet. It allows users to create, access and manage cloud resources without purchasing physical hardware. AWS Free Tier provides an opportunity for beginners and students to explore and learn different AWS services within the applicable free usage limits. It helps users provision resources such as virtual servers, cloud storage and databases according to their requirements and gain practical knowledge of cloud computing.

Advantages of AWS:

1. It provides cloud storage to store data.
2. It allows us to create and manage virtual servers.
3. It provides database services.
4. It is scalable, which means resources can be increased or decreased whenever needed.
5. It provides security and backup facilities.
6. It offers free-tier eligible services for learning and practice, subject to usage limits.

Steps:

1. Open AWS Website: Visit https://aws.amazon.com/ and click on Create Account.
2. Enter Account Details: Provide your email ID and AWS account name.
3. Verify Email: Enter the OTP sent to your registered email.
4. Create Password: Set a strong password for your AWS account.
5. Select Account Plan: Choose the Free account plan, if eligible.
6. Enter Contact Details: Provide your name, phone number and address.
7. Complete Verification: Enter payment details and verify your mobile number using OTP.

8. Select Support Plan: Choose the appropriate support plan and continue.
9. Complete Registration: Submit the details and log in to the AWS Management Console.
10. Access AWS Services: Explore services like EC2, S3 and RDS to create and manage cloud resources.

Output:
